

PROFESSIONAL SUMMARY

Full Stack & Cloud Engineer with hands-on experience in **GenAI systems, cloud infrastructure, CI/CD automation, and production deployments**, with strong ownership across APIs, authentication, infra, and performance optimization.

EDUCATION

- **GLA University, Mathura, India**
Bachelor of Technology, CSE | GPA: 7.86 | Sept 2021 - May 2025
 - **Subha Niketan, Kakinada, India**
Class XII Science | Percentage: 81.8% | June 2019 - August 2021
-

TECHNICAL SKILLS

- **Languages:** Java, Python, C#, TypeScript, JavaScript, SQL
 - **Frameworks:** React.js, Angular, Next.js, Node.js, Express.js, Django, Flask, ASP.NET Core
 - **AI/ML Tools:** LangChain, LangGraph, LangSmith, TensorFlow
 - **Databases:** PostgreSQL, MongoDB, SQL Server
 - **Cloud/DevOps:** AWS, Azure, GCP, Terraform (Basics), CI/CD
 - **Dev Tools:** Git/GitHub, Docker (Basics), Linux, VS Code, Postman
-

PROFESSIONAL EXPERIENCE

Software Engineer – AI

Capgemini | April 2025 – Present

- Built and deployed **5+ production GenAI agents** using LangChain/LangGraph and FastAPI, on GCP.
- Re-architected monolithic LangGraph workflows into a Multi-Agent Supervisor pattern, reducing end-to-end agent latency by **85% (from 12s+ to <3s)** while maintaining high reasoning accuracy.
- Optimized LLM performance and TTFT by implementing prompt caching and state-trimming logic, successfully managing large context windows (**5k+ tokens**) without compromising response speed.
- Leveraged **LangSmith** for deep-trace bottleneck analysis, refactoring synchronous tool execution into parallelized async workflows, which slashed data retrieval times by over **70%**.
- Owned **Dev, Staging, and Production environments**, including deployment planning and cloud configuration.
- Designed and implemented **CI/CD pipelines**, reducing release effort by **90%**.
- Introduced **Redis-based caching**, significantly improving API response times and backend performance.

Full Stack Developer Intern

Moneyy.ai | February 2025 – March 2025

- Developed backend services managing **10K+ trading records** with optimized queries.
 - Integrated **25+ APIs** for trading and investor workflows.
 - Optimized React frontend performance, reducing response time to **~1.2 seconds**.
-

PROJECTS

CogniSuite – Multi-Agent GenAI Platform | [LINK](#)

Tech Stack: LangChain, React.js, FastAPI, Python, Azure AI, Azure Speech Services

- Built a full-stack GenAI platform with **RAG, document intelligence, SVG generation, and voice-based AI**.
 - Designed modular architecture enabling scalable agent orchestration and future expansion.
 - Integrated Azure AI and Speech Services for real-time voice interaction and document analysis.
-

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** | Amazon | [CERTIFICATE](#)
 - **Microsoft Azure Fundamentals (AZ-900)** | Microsoft | [CERTIFICATE](#)
 - **Microsoft Azure AI Fundamentals (AI-900)** | Microsoft | [CERTIFICATE](#)
-

ACHIEVEMENTS

- GEM Award recipient at Capgemini for exceptional ownership and impact
- First intern in Capgemini batch to be deployed on a live project (ahead of 200+ peers)
- Solved **550+ DSA problems** on LeetCode and GeeksForGeeks
